What is TRECVID ?

- Workshop series (2001 – present) → <http://trecvid.nist.gov>
- Started as a track in the TREC (Text REtrieval Conference) evaluation benchmark.
- Became an independent evaluation benchmark since 2003.
- Focus: **content-based** video analysis, retrieval, detection, etc
- Provides data, tasks, and uniform, appropriate scoring procedures
- Aims for realistic system tasks and test collections using :
 - Unfiltered data
 - Focus on relatively high-level functionality (e.g. interactive search)
 - Measurement against human abilities
- Forum for the :
 - Exchange of research ideas
 - The discussion of research methodology – what works, what doesn't , and why

Support

The running of TRECVID 2020 has been funded directly by:

- National Institute of Standards and Technology (NIST)
- Intelligence Advanced Research Projects Activity (IARPA)
- Defense Advanced Research Projects Agency (DARPA)

TRECVID is only possible because of the additional efforts of many individuals and groups around the world.

Resources & Contributions

- Luca Rossetto and Heiko Schuldt (University of Basel) who Provided the V3C dataset, master shot reference and metadata
- Georges Quénot at LIG who provided the master shot reference for the IACC.3 video
- The LIMSI Spoken Language Processing Group and Vocapia Research provided ASR for the IACC.2-3 videos and HAVIC data
- Koichi Shinoda of the TokyoTechCanon team agreed to host a copy of the IACC.2 data
- Noel O'Connor and Kevin McGuinness at Dublin City University along with Robin Aly at the University of Twente worked with NIST and Andy O'Dwyer plus Rob Cooper at the BBC to make the BBC EastEnders video available for use in TRECVID
- Alan Smeaton and Yvette Graham (DCU, Ir) for supporting the video-to-text Direct Assessment annotations
- Andrew Weinert and Jeffrey Liu (MIT Lincoln Laboratory) for their support to the DSDI LADI dataset
